Abstract

I did not write a research paper titled *a computerized method for detection of acute cerebral infarction on CT images*.

1 Background

I have been receiving numerous invitations to *ResearchGate* inviting for me to claim the research paper titled *A computerized method for detection of acute cerebral infarction on CT images*.^[1]

The purpose of this research is to explore the hypothesis that I did not write the aforementioned research paper.

2 Observations

2.1 Not affiliated with Kumamoto University Graduate School of Health Sciences

I never have been affiliated with *Kumamoto University Graduate School of Health Sciences*, and is not even active in the field of medical research.

2.2 No recollection of participation

I do not have recollection participating in writing in part or whole, of *a computerized method for detection of acute cerebral infarction on CT images*.

3 Conclusion

I did not write the research paper titled *a computerized method for detection of acute cerebral infarction on CT images* so I recommend the scientific community to stop inquiring me about it.
